

The innovative scrubbing machine which allows a dramatic reduction in the cost of cleaning

Available in the version with one 60 cm working width disc brush as well as in the version with two 65, 75, 85 and 100 cm disc brushes and in the version with 1 cylindrical brush with a working width of 69 cm

Innova 60 B is the highly user-friendly scrubbing machine suitable for maintenance cleaning of commercial surfaces up to 3000 sq.m

Innova 60 B is a battery ride-on scrubbing machine with automatic traction drive available in the version with 1 disc brush, with a working width of 61 cm.

Innova 60 B was designed in order to replace a walk-behind scrubbing machines, with the aim to drastically reduce sq.m scrubbed cost offering a real competitive advantage, particularly for the end user.

PLUS Compared to a walk-behind scrubbing machine Innova 60 B offers the following benefits:

- Advantageous purchase price,
- Economic advantage while using it. Extremely convenient to clean surfaces, starting from 1200 sq.m with at least two cleaning operations per week,
- The economic advantage to use it up to four non-stop working hours thanks to the optimization of energy consumption,
- Compact size which allows the machine to pass even through traditional doors or be transported in lifts,
- The advantage of performing even in highly noise-sensitive environments such as nursing homes and hospitals, thanks to its very low acoustic pressure level.

**User-friendliness
WITHOUT ADDITIONAL COSTS
FOR OPERATOR TRAINING**

Just turn the key to start working immediately

The brush head and the squeegee are lowered/raised by simply using two levers

Innova 60 B

Innova 65/75/8

Innova 65/75/85/100 B - 70 S.

Maximum equipment and maximum cost saving for maintenance cleaning costs of surfaces up to 3500 sq.m

Innova 65/75/85/100 B - 70 S is a battery ride-on scrubbing machine with automatic traction drive, available in the scrubbing version with 2 disc brushes, with working width of 65, 75, and 85 cm and in the sweeping version with 1 cylindrical brush of 69 cm.

Innova 65/75/85/100 B - 70 S is a scrubbing machine which guarantees a dramatic reduction in the cost of cleaning thanks to an advantageous purchase price and complete equipment of all Comac systems which reduce waste and consumption.

PLUS Compared to a walk-behind scrubbing machines Innova 65/75/85/100 B - 70 S offer the following benefits:

- No more operator training thanks to "Working program selector" equipped as standard,
- Optimization of consumption thanks to the Start&Stop device equipped as standard which ensures a working autonomy increase up to 35% (compared to the previous model) so that the machine can be used for up to four non stop working hours,
- They generate a very low acoustic pressure level.

Thanks to Comac water and detergent dosing system (CDS, Comac Dosing System) solution (water and detergent) saving up to 50% is ensured

More autonomy up to 35%

Separate management of water and detergent

Innova 65/75/85/100 B - 70 S machines are equipped with a CDS as well as a water distributor system which guarantees a uniform distribution of water on both brushes: even with reduced flow rates. In addition, Innova 65/75/85/100 B - 70 S machines are equipped with a START&STOP system which stops water flow and brushes when the machine is idle

A simple device (optional) allows the quick filling of the tank with clean water without the presence of the operator

5 B

Innova 100 B

Innova 70 S

Innova 65/75/85 is equipped as standard with a device that allows the adjustment of the working width from 65 to 85 cm.
(for further information, please contact Comac Technical Assistance Service)

Innova 60/65/75/85/100 B - 70 S machines are safe, productive and user-friendly

Low center of gravity for optimum stability. Capable of ramp gradients up to 18%

Automatic swing-in of the brush head when accidentally impacted (Innova 65/75/85/100 B)

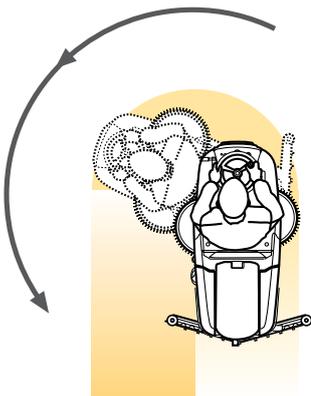

Automatic squeegee uncoupling when accidentally impacted

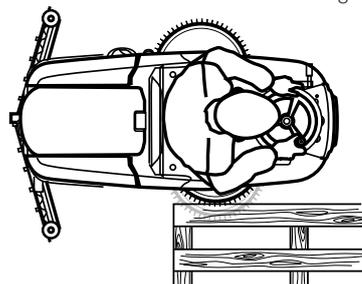

The vacuum head is silenced, guaranteeing a very low acoustic pressure level and allowing to perform in highly noise-sensitive environments such as nursing homes and hospitals, without disturbing the environment or the people who live in it

Innova 60/65/75/85/100 B - 70 S is available on request with a support for your manual cleaning kit, that allows to complete the cleaning operation

Best manoeuvrability even in narrow spaces thanks to tight turning diameter

Perfect cleaning along walls

Innova 65/75/85/100 B - 70 S. No more time and costs for the operator training thanks to the working program selector

The working program selector offers an extremely intuitive approach even for non-specialized operators. It allows to choose the selection of four pre-set working programs: **Transfer, Drying, Scrubbing/Drying, Scrubbing only.**

Once selected the most suitable program, Innova 65/75/85/100 B - 70 S does all the thinking.

Innova 60/65/75/85/100 B - 70 S. Simple and quick maintenance operations

Easy battery charging thanks to the possibility of an onboard battery charger (on request)

Easy and complete tank sanitizing

Easy rubber replacement without any tools on the exclusive Comac squeegee (Patent Pending)

B - Battery powered machine with voltage value

Machine for commercial use

professional people

The machines are manufactured in compliance with the directives 2006/42/CE, 2006/95/CE, 2004/108/CE and with the standards IEC 60335-1 and IEC 60335-2-72.

The steel parts are subject to treatment which guarantees a long life and makes the parts oxidation-proof.
